

Helping Kansas Schools Achieve Their Vision

Providing an excellent educational experience for your students is your main focus. Your vision is to create a safe, comfortable environment that drives scholastic success and community engagement. You know that modern infrastructure and technology help promote community growth and attract new teachers and students. But the cost of success is increasing along with your operating costs. At every turn, you are competing for the funding you need to support your strategic goals.

Energy efficiency and capital reinvestment program

Schneider Electric can help you prepare your district for the future with innovative solutions and creative funding leveraged through a comprehensive capital recovery and reinvestment program. Our experts will help you reinvest in your organization in order to modernize facilities and technology, generate revenue, and drive sustainable behavior through fun educational programs to ultimately take your community further.

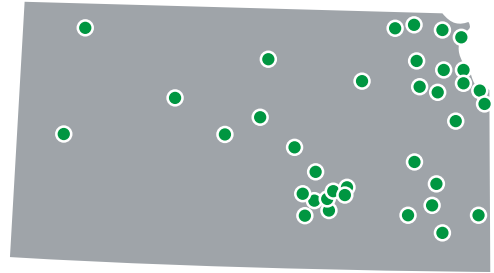

Program overview

- Innovative means to upgrade aging facilities, systems and technology
- Comprehensive program includes design, construction, performance guarantee
- Single point of contact manages every detail of your project to mitigate performance risk
- Collaborative approach to project development helps achieve your vision
- Free up operational dollars for other priorities or unlock additional funding
- STEM and energy conservation educational programs positively impact your community
